

All your Data. Better Insights. Lightning Speed

Audit Analytics can deliver never seen before data insights, greater exception accuracy, tests 100% of data more frequently, and automates identification of control breaches. It's no surprise there is renewed demand by Audit and Risk professionals for Audit Analytics to be an integral part of their operation.

Perform audit analytics that produce fast, valuable and accurate data insights. Satori Analytics is the latest in Audit Analytics technology, knowledge, experience and skills.

Satori Analytics is more than a software
Your local partner in Australia and New Zealand, we bring you the latest technology together with 20 years of experience.

Satori means enlightenment

It's our mission to shine a light on your data and share our knowledge and expertise through virtual training and the excellent support and care that we bring to every Satori Customer relationship. We are here to help you and your organisation succeed through every step of your analytics journey.
